

# SECCO<sup>®</sup> Windows Tape Inside / Outside

## Product description

**Secco Windows Tape Inside** - blue, vapor barrier tape polypropylene, whose task is to secure the connection window wall on the inside. The tape is a vapor barrier restricting the flow of air and water vapor from inside the room into the slot of the window. The product is equipped with a special adhesive strips facilitating the assembly of both the window frame (adhesive tape) as well as the wall (butyl tape). Along with **Secco Inside Windows Tape** should be used tape **Secco Outside Windows Tape**, which is vapor-permeable insulating barrier that protects against access by atmospheric factors from the outside.

**Secco Windows Tape Outside** - White, vapor permeable polypropylene tape, whose task is to secure the connection of the window with a wall on the outside. The tape is an insulating barrier that protects against access to atmospheric agents (rain, wind, low temperatures), while maintaining high performance vapor permeability to allow evaporation of water accumulated slot window by diffusion or leak in the outer sheath seal. The product is equipped with a special adhesive strips facilitating the assembly of both the window frame (adhesive tape) as well as the wall (butyl tape). Along with **Secco Outside Windows Tape** be used tape **Secco Inside Windows Tape**, which is a vapor barrier restricting the flow of air and water vapor from inside the room into the slot of the window.

- easy to install
- butyl tape
- acrylic tape

roll width	7.5 cm / cm 12.5
roll length	25 mb
The weight of non-woven fabric	140 g / m <sup>2</sup> (Inside) / 120 g / m <sup>2</sup> (Outside)
Colour	Blue (Inside) / White (Outside)
